

MasterLock 1500EDBX Teardown

Exploring the new electronic lok from MasterLock.

Written By: Josh Thomas

INTRODUCTION

Just a good view of the internals, for those that love MSP430 chips

Step 1 — MasterLock 1500EDBX Teardown

- A new lock, now with more buttons and less spinning!

Step 2

- Prepare lock for spuding
- Insert spudger and tap with hammer
- Gently pry until the lock opens

Step 3

- Open lock with mechanisms exposed
 - Vibrator
 - Locking mechanisms

Step 4

- Complete internals of the lock
- Main processing board
 - MSP430 based!
 - Servo that interacts with locking components
- Reactive buttons and LEDs

Step 5

- The real lock PCB
- As a note, this device does not function as a lock once torn down. Repairability = 0.

To reassemble your device, follow these instructions in reverse order.
